

Simple Hybrid Cloud Is Within Reach

With legacy infrastructure,
the promises of modernization and
the hybrid cloud are hard to achieve:

High Costs

Management Complexity

Lack of Insight

Security Risks

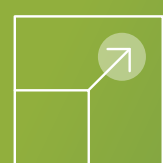

What if you could instead:

- Automate infrastructure to simplify tasks
- Easily and quickly scale as needed
- Continuously protect your data
- Only pay for the IT resources you consume
- Seamlessly manage your data across on-premises and hybrid-cloud environments

This is future-proof infrastructure.
This is the new **FlashStack**.

The new **FlashStack**
is architected from the ground up:

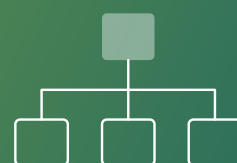

Flexible Consumption

Software Defined

Discretely Provisioned

Holistically Managed

You will achieve greater:

- Simplicity
- Observability
- Efficiency

FlashStack is ideal for:

- Enterprise workloads like SAP, Microsoft SQL Server, virtual desktop infrastructure (VDI), and Oracle Database
- Cloud-native and containerized apps
- AI/ML-driven analytics

FlashStack customers are realizing significant value:¹

72%

72% reduced total cost of operations

97%

97% reduction in unplanned downtime

72%

72% more efficient IT infrastructure management

**And you can consume
FlashStack as-a-Service:**

Simple

One subscription,
one bill for easy
procurement and
provisioning

Agile

Always-on right-scaling
for on-premises
and hybrid-cloud
landscapes

Economical

True utility-like
consumption
for optimized
resource usage

A future-proof infrastructure is yours for the taking.
