

Customer Story

Vetted Review Verified User

“Pure Storage has replaced our entire NetApp Storage Infrastructure”

Why This Verified Reviewer Needed Pure Storage FlashArray

“Pure Storage FlashArray satisfies all of the issues we used to have such as IO issues and encryption. Pure Storage is encrypted by default at rest and this was a huge benefit for all the audits we go through.”

How This Verified Reviewer Uses Pure Storage FlashArray

“Pure Storage has replaced our entire NetApp Storage Infrastructure. We have used Pure Storage in all of our use case scenarios. VMware, SQL, Oracle, and even file servers.”

What This Verified Reviewer Likes Most About Pure Storage FlashArray

“Pure is king when it comes to simplicity. I worked with many different storage vendors and many of them are overly complex. With Pure, a teenager with no IT experience can administer the storage array and not have any issues.”

What This Verified Reviewer Has Achieved With Pure Storage FlashArray

“Our SQL, Oracle, and VM performance is off the charts. No delays like we used to have with NetApp.”

This Verified Reviewer's Advice

“My advice to all customers would be, in the long run, you will be saving money with Pure's Evergreen program, and with Pure, you will get peace of mind and sleep again at night.”
