

Paolo Juvara

CHIEF DIGITAL TRANSFORMATION OFFICER

Paolo Juvara joined Pure Storage in 2021 as Chief Digital Transformation Officer. With more than 25 years of software development leadership, he is responsible for leading the IT organization and defining the strategy for the systems, technology and tools running Pure's data-centric, secure business operation. Additionally, he is chartered with building the infrastructure to support the e-commerce and customer lifecycle engagement engine for Pure as-a-Service customers.

Paolo is a software development executive with international experience both in large and entrepreneurial organizations, from hands-on product development and design, to strategy and business operations. Prior to joining Pure, Paolo was the VP of Engineering and CIO for Google Cloud, leading an organization whose mission is to build the next generation of enterprise applications to drive scale and power the growth of Google Cloud. Before Google, Paolo was the Group Vice President of Oracle Application Labs, the organization within Oracle which manages all the applications that run Oracle.

Paolo has lived and worked in four different countries (France, Italy, Spain, and US) and graduated from Politecnico di Milano with a degree in Electronic Engineering and a specialization in Software Engineering.
