- End-to-end user acceptance testing

Flexibility

- Work with Pure's Services to implement according to your schedule

Outcomes

- Approved detailed solution design
- Full design documentation
- Operations guide/runbook
- Knowledge transfer

The FlashBlade//S installation service from Pure Storage® is simple and cost-effective, ensuring that you can leverage all the benefits of your Pure solutions quickly and effectively. Our installation service allows your IT resources to stay focused on their core priorities, and our experts and the associated proven processes reduce the time to value and the risk to your storage environment.

The End-user Experience

As an integral part of the Pure Storage® Customer Experience (CX) team, Pure's Services exist to enable you to realize the value of your IT investments. We engage with organizations to evaluate, activate, and innovate their Pure solutions. Through the phases of a customer engagement, we provide services and solutions to achieve and accelerate your business outcomes. Our FlashBlade installation services are designed for organizations that want to quickly activate the full potential of their FlashBlade//S systems using best-in-class deliverables. Pure's Services offer a rapid methodology to deploy and install a Pure FlashBlade//S solution. Our installation service ensures an effective time to value by helping you to prepare your environment, using appropriate project management and resource planning.

Features

From the first planning call to a knowledge transfer session, Pure Services provide guidance and support for the entire Flash Blade//S installation with:

- **Flexibility:** We implement according to your schedule, and plan for system validation testing and knowledge transfer in a preparation call.
- **Pre-implementation planning:** Get guidance with our pre-installation checklist, review of site preparation best practices, and confirmation of

readiness. Our team will conduct a discovery session to review your environment, confirm configuration details, and schedule the installation.

- **Pure OS initialization:** Pure will perform a complete health check, configuration, and hardware tests to validate correct installation of the array.
- **SAN and network connectivity:** Our team will assist you in configuring and providing connectivity to FC and/or iSCSI SAN networks along with FC zoning configuration. We will also ensure connectivity between nodes living on the FlashBlade//S, verification of node network failover, and hardware health.
- **Knowledge transfer:** We work with your team to review configuration from end-to-end and review best practices.

How to Order

For ordering information, please reach out to your regional Services Sales lead or contact the Services Sales Desk via email.
