DATA SHEET

FlashBlade to FlashBlade//S Platform Upgrade Service

Efficiently upgrade your existing FlashBlade to a FlashBlade//S

Highlights

- Single chassis platform upgrade from FlashBlade to FlashBlade//S

Flexiblity

- Work with Pure Services to implement according to your schedule

Outcomes

- FlashBlade upgraded to a FlashBlade//S

FlashBlade//S™ is the next-generation FlashBlade®, designed for exabyte scale to support the needs of modern data and applications for the next decade and beyond. It builds on the simplicity, reliability and scalability of the first-generation FlashBlade.

FlashBlade//S leverages Pure Storage's industry-leading, all-flash hardware and software innovation and is built using all-QLC architecture and DirectFlash® Modules. The best-in-class solution is designed to support data-heavy, unstructured workloads efficiently, providing unequaled density, capacity, and performance.

By deploying a strict and proven delivery methodology, Pure Services can upgrade an End User's single chassis FlashBlade array to a single chassis FlashBlade//S as efficiently as possible.

The End User Experience

Pure Services can help you realize the value of your IT investments. As an integral part of the Pure Customer Experience CX team, we engage with organizations to evaluate, activate, and innovate their IT solutions.
