

DATA SHEET

FlashRecover QuickStart Installation

Quickly realize the full potential of your FlashRecover install.

Highlights

- Accelerated time to value
- Comprehensive readiness assessment
- Goal, expectation, and environmental recommendation review

Flexibility

- Simplified workload creation and validation
- Work with Pure Services team to schedule a project that doesn't disrupt your business

Outcomes

- Plan, design and implement a custom, fully validated recovery solution
- Configuration and alert monitoring and reporting
- Knowledge transfer for rapid adoption and operation

Pure Storage® offers a modern data recovery solution that's smarter, simpler, smaller—and more efficient than ever before. Developed jointly with Cohesity, the FlashRecover™ data recovery solution delivers maximum performance and reliability for business-critical applications, DevOps, and modern analytics.

The End-user Experience

Pure Services helps you realize the value of your IT investments. The FlashRecover QuickStart service provides expert assistance in implementing your backup and recovery solution. The service is designed for organizations who want to quickly activate the full potential of their FlashRecover solution with a comprehensive remote or on-premises configuration and accelerated time to value for the workloads. Our goal is to uncomplicate how your IT team works to manage your Pure data services.

The FlashRecover QuickStart service provides the following outcomes:

- **Solution planning and design:** A plan based on the business requirements for your data protection needs. The result is a best practice design specific to your environment.
- **Implementation and validation:** Creation and implementation of clusters, domains, and views. This includes adding clusters to specified data and management networks, enabling cluster core management services, joining the clusters to active directory, configuring the proxy server, and configuring storage domains and views. The completed FlashRecover solution implementation is validated with a sample workload.

- **Monitoring, alerts, and reporting:** Monitoring of the FlashRecover solution configuration, review and resolve alerts, removing, and creating ad-hoc reports as necessary. This also includes generating on-demand reports and download raw data.
- **Knowledge transfer and support:** Enables your staff to support the Cohesity Data Platform. Provides an overview of support processes, including how to open cases and follow through on status and action plans.

How to Order

For ordering information contact your local Pure sales representative or visit www.purestorage.com.

Service Offering	Service SKU	Description
Small Flash Recover QuickStart	PS-FR-COHESITY-QUICKSTART-SMALL	Remote creation of VMWare, SQL, and/or Oracle workloads (configuration, implementation, and support) for small environments (up to 3 days).
