Pure Fusion™ gives you the ability to build “self-storage clouds,” changing the management paradigm. Additionally, it also gives you the ability to self-provision your own storage. Pure Storage® FlashArray™ is the all-flash, 100% NVMe shared accelerated storage designed for mainstream enterprise deployment. The Pure Services team can plan and execute a rapid deployment of your new dedicated Fusion FlashArray system.

The End-user Experience

Pure Services exists to enable you to realize the value of your IT investments. As an integral part of the Pure Customer Experience (CX) team, we engage with your organization to evaluate, activate, and innovate your IT solutions.

The Fusion FlashArray Installation Service is designed for organizations that want to quickly activate the full potential of their Fusion Solution using FlashArray. Our teams use a strict methodology to deploy and configure the Pure FlashArray series. Our approach can accelerate time to value and ensure that your environment is fully prepared.

Fusion FlashArray Installation Service Deliverables

- **Pre-implementation planning:** Our Services team will conduct a discovery session to review your environment, confirm configuration details, and schedule the install.
- **Hardware installation:** We will unpack, rack, cable, and power up your new array.
- **Purity initialization:** Once installed, our team initializes the Purity operating system and configures Fusion FlashArray according to your requirements, including Fusion tunables.

- **Connectivity verification:** We will connect to the your SAN infrastructure and validate connectivity, including connectivity to Pure1®.
- **Knowledge transfer:** We will walk you through the GUI, providing an operational overview of the Fusion FlashArray and answers any questions you may have regarding the installation
