

DATA SHEET

Professional Services for Portworx

Clearly defined, outcome-driven expert assistance in the design and implementation of persistent storage for Kubernetes.

Leverage Portworx Professional Services to reduce time-to-value from your Portworx Enterprise investment. Deploy the GigaOm-recognised leader in Cloud Native storage in your environment, to your requirements, and to your deadlines.

Portworx® from Pure Storage® provides a purpose-built, enterprise-class container storage infrastructure for Kubernetes-based platforms. This infrastructure includes a scalable, redundant, automated, and distributed storage layer that allows for deploying stateful containerized applications efficiently. Application data migration, snapshots, data backups, topology awareness, and other enterprise features make Portworx an invaluable technology for organizations with application containerization projects.

Highlights

- Deploy Portworx as a Persistent Storage Solution for your Kubernetes-based applications.
- Methodical approach to the design and deployment of the best possible Portworx solution for your requirements.
- Reduced time to value from your investment.

Flexibility

- Flexible offerings for the lifecycle of Portworx including assessment and deployment services.
- Work with Pure Professional Services to implement according to your schedule.

Outcomes

- Installed and validated Portworx environments.
- Persistent storage solutions including DR and Backup options.
- Assessments of current Portworx infrastructure with remediation recommendations.
- Comprehensive reports detailing as-deployed Portworx infrastructure.

The End-User Experience

Design and deployment services provide your teams with consultation and best practices designed to deploy your persistent storage solution in Kubernetes. You will also build strength and agility in your DevOps team. The goal is to accelerate not only the deployment of Portworx, but of those mission-critical applications that underpin your business and its growth.

Portworx Health Check Service

Pure Professional Services will work with your team to analyze up to three existing Portworx installations by assessing feature adoption and deployment, validating your operational processes and configurations with a comprehensive set of best practices and recommendations.

Portworx Design and Deployment Services

Our approach enables your team to start leveraging Portworx quickly and efficiently with methodical approaches leveraged to ensure production-ready deployments of the Portworx suite of products.

PX-Enterprise® Design and Deployment

The PX-Enterprise Design and Deployment service is a fixed-scope remotely delivered service that provides an enterprise deployment of Portworx on up to three clusters of the same Kubernetes-based orchestrator. Pure Storage architects will work together with your team to deploy Portworx by providing the design, installation, and configuration of one of Portworx Enterprise, Portworx CSI for FlashArray™/FlashBlade® or Portworx Essentials, and, if required, an instance of PX-Central. Pure Storage will provide knowledge sharing and best practices feedback throughout the service. Specific scope and limitations included in the Service Brief, please consult your account representative for details.

PX-Disaster Recovery Design and Deployment

The PX-Disaster Recovery Design and Deployment service is a fixed-scope remotely delivered service designed to complement the Enterprise Design and Deployment Service by installing either a single PX-DR SYNC (also known as Metro DR) cluster spanning two Kubernetes clusters, or a single PX-DR ASYNC configuration spanning two Kubernetes clusters. Pure Storage will provide knowledge sharing and replication best practices feedback throughout the service. Specific scope and limitations included in the Service Brief, please consult your account representative for details.

PX-Backup Design and Deployment

The PX-Backup Design and Deployment service is a fixed-scope remotely delivered service that deploys Portworx data protection via a single PX-Backup installation. Pure Storage will show you how the solution works using a non-production stateful application and performing policy-based backup and recovery operations. Specific scope and limitations included in the Service Brief, please consult your account representative for details.

PX Custom Deployment

Pure Professional Services will scope a custom engagement to meet your Portworx deployment and environment configuration goals. The engagement will provide the mutually agreed upon scope and include best practices and recommendations as needed to ensure the desired outcome.

How to Order

For ordering information contact your local Pure Storage sales representative or visit www.purestorage.com.

Service Offering	Service SKU	Use Case
PX Health Check Service	PS-PX-HEALTHCHECK	Review, best practices and recommendation service for up to three
PX-Enterprise Design and Deployment	PS-PX-ENTERPRISE-DESIGN-DEPLOYMENT	Remote Enterprise deployment of Portworx on up to three clusters.
PX-DR Design and Deployment	PS-PX-DR-DESIGN-DEPLOYMENT	Remote Disaster Recovery service complementary to Enterprise Design and Deployment.
PX-Backup Design and Deployment	PS-PX-BACKUP-DESIGN-DEPLOYMENT	Remote data protection Backup Installation Service.
PX-Deployment Service Advanced	PS-PX-DEPLOYMENT-SERVICE-ADVANCED	Used for SOW based custom scoped services.

Service offerings and SKUs.

About Pure Storage Professional Services

Whether you are planning your next-generation storage system, need specialized know-how for a major storage deployment, or want to optimize the investment in your digital transformation, Pure Storage Professional Services and our certified partners have the expertise to assist. Discover how your IT environment can achieve the outcomes that matter most to your business. Contact your local Pure Storage sales representative or visit www.purestorage.com.
