Use a full sentences and paragraph format with 75-120 characters.

DATA SHEET

SafeMode QuickStart and Advisory Workshop

Expert recommendations and implementation for deploying data protection features for FlashArray systems.

Backups safeguard critical data against common scenarios like disasters, data corruption, or accidental deletions. But ransomware can stress existing data-protection infrastructure even more. Pure Storage® SafeMode™ snapshots, available with FlashArray™, provide immutability to protect data backups from ransomware attacks.

The End-user Experience

Pure Services helps you realize the value of your IT investments. Our Professional Services offer two SafeMode services: Advisory Workshop and QuickStart Service. The Advisory Workshop is designed to help you understand and plan the implementation of SafeMode as part of your data protection strategy. The QuickStart Service is designed to quickly configure and deploy snapshots for added data protection using the SafeMode feature.

The SafeMode Advisory Workshop provides a complete design, deployment, and validation of your SafeMode solution. This service provides the following outcomes:

- Snapshot and SafeMode technology overview and best practices
- Assessment and the readiness of your environment for SafeMode implementation
- Recommendation of a phased and logical implementation approach for SafeMode

The SafeMode QuickStart helps you with the following outcomes:

- Configure asynchronous replication between a new FlashArray//X™ and a new FlashArray//C™

- Or Configure snapshot offload via NFS from a new FlashArray//X to a new FlashBlade®

- Deploy example snapshot and replication policies via Protection Groups

- Demonstrate Protection behavior before and after SafeMode enablement

- End-user Deck with background information and deployment configuration

How to Order

For ordering information contact your local Pure sales representative or visit www.purestorage.com.

SafeMode QuickStart and the SafeMode Advisory Workshop are available as fixed-price services. In addition, Pure can tailor an advanced service to fit your specific needs. Please contact your local Pure sales representative for more details.

Service Offering	Service SKU	Description
