

DATA SHEET

ActiveCluster Advisory Workshop and Implementation

Improved business continuity with symmetric active-active bi-directional replication.

Pure Storage® ActiveCluster™ is a critical component of any organization's business-continuity plans. Once implemented, you can effortlessly enable zero recovery point objective (RPO) and zero recovery time objective (RTO) between two Pure Storage FlashArray™ systems with true active-active synchronous replication for transparent failover. Built into FlashArray, ActiveCluster comes with the Pure1® Cloud Mediator, a SaaS-based quorum witness that eliminates the need for a third site. Failovers complete safely, automatically, and transparently. If an array fails, Cloud Mediator ensures your hosts access data on the other array.

The End-user Experience

Pure Services helps you realize the value of your IT investments. We offer two services to help you activate the ActiveCluster feature: a Readiness Assessment and an Implementation Service. Our goal is to uncomplicate how your IT team works to manage your Pure data services.

The ActiveCluster Readiness Assessment service is designed to help you activate the business continuity and replication features of your FlashArray. It provides the following outcomes:

- Scope of work and schedule to align with your business's high-availability needs
- Analysis and design for the business continuity architecture
- Established synchronous replication between arrays
- Failover testing
- Knowledge transfer sessions

Highlights

- End-to-end comprehensive array-replication solution
- Active-active synchronous replication for transparent failover

Flexibility

- Two ActiveCluster services, a Readiness Assessment and an Implementation service
- Work with Pure Professional Services team to implement according to your schedule

Outcomes

- Fully tested and validated replication solution with customer-directed failover scenarios
- Knowledge transfer for rapid adoption and operation

DATA SHEET

The ActiveCluster Implementation service provides a complete design, deployment, and validation of your ActiveCluster solution. The service provides the following outcomes:

- A validated and operational ActiveCluster environment
- A report to the End User that outlines the site validation testing approach and outcomes of each failover scenario
- Final version of the configuration recommendations for future site reference

How to Order

For ordering information contact your local Pure sales representative or visit www.purestorage.com.

Service Offering	Service SKU	Description
ActiveCluster Readiness Assessment	PS-ACTIVECLUSTER-ADVISORY-WORKSHOP	Assess environment readiness
ActiveCluster Implementation	PS-ACTIVECLUSTER-DEPLOYMENT	Active-active synchronous replication of FlashArrays

Companion Service to ActiveCluster Advisory Workshop

To further enhance and accelerate your ActiveCluster Advisory Workshop and Implementation experience, Pure recommends the following service:
