The Six Biggest VDI Challenges

Today's distributed workforce presents enormous challenges for IT leaders. Do any of these sound familiar?

 <p>Poor Stability for Mobile Users</p> <p>You can't reliably deliver access to desktop data for today's distributed, remote teams.</p>	 <p>Poor End-user Experience</p> <p>Your end users' experiences are poor—examples include lengthy logons, slow app load times, and boot storms.</p>	 <p>Challenging Security Mandates</p> <p>You need to meet corporate mandates to secure data and comply with industry standards.</p>
 <p>High Cost per Desktop</p> <p>Your VDI solution is expensive, including high storage costs and complex storage management overhead.</p>	 <p>Difficulty Scaling</p> <p>You're unable to seamlessly add users due to complex refreshes and data migrations.</p>	 <p>Difficulty Deploying</p> <p>Your process is slow. Procuring, architecting, deploying—it takes months before to get up and running.</p>
