

Top 8 Reasons to Power Security Analytics With Pure

01 Enhance Real-Time Threat Detection

Analyze more threats in real-time with high speed ingest and reliable all-flash performance that keeps up with demanding complex queries and real-time processing.

02 Speed Analytics at Cloud Scale

Accelerate mean time to detect (MTTD) and the mean time to remediate (MTTR) security threats with fast access to real-time and historical data with linear, consistent performance increases as you scale.

03 Detect Advanced Threats Faster

Confidently address a broader range of Advanced Persistent Threats (APT), forensic analysis, and legal discovery requirements with faster access to high volumes of historical data.

04 Power Every Analytics Tool, From Ingest to Visualization

Add applications and adapt to workload changes from batch to real-time, sequential or random I/O, small or large file size, with ease.

05 Enable Efficient, Agile Resource Deployment

Independently scale compute resources and efficiently build a single scale out resource for efficient storage deployment with a disaggregated architecture.

06 Keep Security Applications up and Running

Benefit from nondisruptive scale and replacement while minimizing costly rebalancing, data re-hydration, and rebuild operations through disaggregation.

07 Focus on Security Insights, Not Infrastructure Operations

Simplify operations with easy to upgrade, easy to install systems that eliminate performance tuning requirements.

08 Protect Investments With an Agile Platform

Get agile with a cloud-optimized platform supporting unified fast file and object support.

See What Pure Can Do for You

Over **8,000 global organizations** already trust Pure

Our NPS score is in the **top 1% of B2B companies**

FlashBlade is a **Gartner Peer Insights Customer's Choice**
