PURESTORAGE®

Evergreen//One Snapshot Retention Add-on

Predictable snapshot protection with flat-rate pricing

Take the guesswork out of snapshot sizing. With the Evergreen//One™ Snapshot Retention Add-on, you can protect data without worrying about unpredictable costs. This add-on offers flat-rate pricing based on retention duration—no overages, no complex calculations. Just pick a tier, and we'll handle the rest.

Snapshot Simplicity with Predictable Pricing

Snapshot policies are central to enterprise data protection, but forecasting snapshot space usage has historically been a challenge. With the variability in snapshots and the resulting financial uncertainty, many organizations are not leveraging the full benefits of snapshots. The Evergreen//One Snapshot Retention Add-on solves this by offering flat-rate pricing based on selected retention periods. This eliminates sizing friction, simplifies billing, and removes the unpredictability of snapshot costs, making it easier to both plan for and leverage Snapshots.

Why Choose This Add-on

- Eliminates complex snapshot sizing exercises
- Avoids unpredictable metering charges
- Aligns costs with data protection business outcomes
- Supports both manual and policy-based snapshots
- Global availability across all Evergreen//One regions

Built-in Flexibility with Fair Use

This add-on is designed to support a wide range of workloads with a generous fair use policy. While it's not unlimited, it provides ample capacity for most needs—helping you optimize storage without surprises. In the rare event usage exceeds typical thresholds, you still benefit from predictable costs and overall savings.

Key Benefits

- Flat-rate pricing removes guesswork
- Snapshot consumption included in reserve
- Retention policy-based billing

Ideal for Multiple Use Cases

- Customers with snapshot-heavy environments
- Use cases with long snapshot retention needs
- Teams needing predictable storage billing

Service Summary

- Available add-on to UBF and UDR licenses
- Choose from 14-day, 90-day, or 365-day tiers
- Uplifts of 15%, 25%, or 35% respectively

Compatibility and Availability

- Available for all UBF and UDR (Block & File) Evergreen//One licenses

- Applies to snapshots within the selected retention tier

- Manual snapshots are included if age falls within the chosen tier

- No restrictions on actual/operational snapshot usage

- Snapshot retention can be upgraded mid-term; reduced or removed at renewal

How It Works

Customers choose from three retention tiers. All snapshots within the selected retention window are included in the reserved capacity. These snapshots do not accrue on-demand charges and are not metered separately. Customers can change their tier mid-term or at renewal.

Tier	Retention Period	Pricing Uplift
14-day	14 days	15%
90-day	90 days	25%
365-day	365 days	35%
