

SOLUTION BRIEF

Pure FlashArray File Migration Services

Powered by Datadobi

The ability to utilize the latest storage technology depends on how quickly, efficiently, and minimally disruptively you can migrate data from legacy storage systems and bring it online. Pure Storage® Professional Services offers the FlashArray™ File Migration Service, powered by Datadobi, to simplify the NAS file-migration process, allowing you to quickly realize the benefits of FlashArray. This service eliminates pain points associated with migrating data from other storage systems, giving back your time, saving you money, and minimizing worries you may have about migrations.

Pure Storage Professional Services, in partnership with Datadobi, can help you get the best results and optimized efficiencies from your FlashArray file migration.

Datadobi

Datadobi, a global leader in unstructured data management and storage software solutions, brings order to unstructured storage environments so that the enterprise can realize the value of their expanding universe of data. Their software allows you to migrate and protect data while discovering insights and putting them to work for your business. Datadobi takes the pain and risk from the data storage process and does it up to 10x faster than other solutions at a better economic cost point. Founded in 2010, Datadobi is a privately held company headquartered in Leuven, Belgium; New York City; and Melbourne.

DobiMigrate® changes the unstructured migration equation with purpose-built software that validates the integrity of your data during a migration, while significantly reducing outage windows and the effort required.

Service Highlights

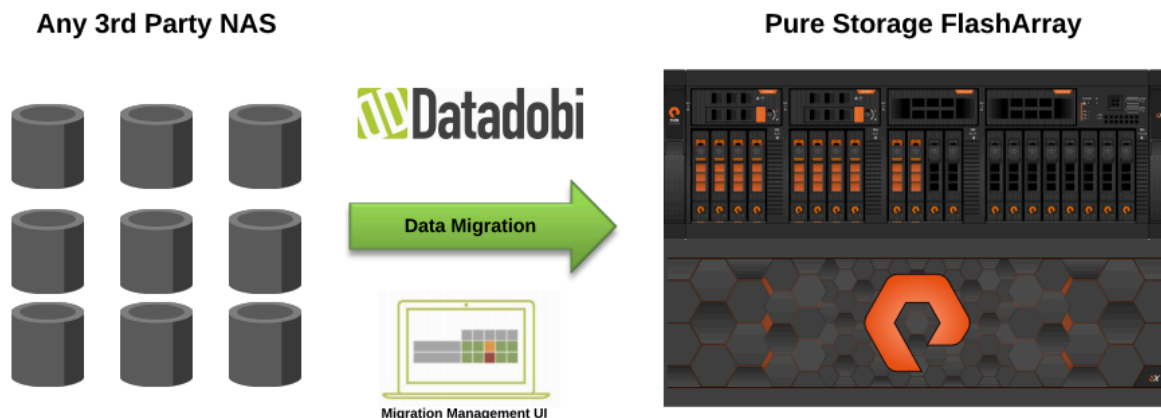

- End-to-end comprehensive migration
- Easy-to-follow transparent process with dashboards that provide visibility as migration progresses
- Minimally disruptive migrations that minimize operational impact
- Hashing of every single file for chain of custody

Flexibility

- Collaborate with Pure Professional Services from start to finish
- Schedule, migrate, and cutover within a timeframe that suits your business

Outcomes

- Fully tested and validated file migration
- Peace of mind knowing that a successful migration has taken place

DobiMigrate is an intelligent end-to-end migration solution that helps reduce effort, cost, and duration. With DobiMigrate you can:

- Get a single solution for migrating from NetApp, Isilon, or Unity (NFS/SMB) to Pure Storage FlashArray.
- Substantially reduces migration times.
- Reduces the level of effort with complete end-to-end automation.
- Reduces risk inherent in a complex manual process and know that every migrated file has a chain of custody.

Simplify: DobiMigrate eliminates the complexity that comes with an increase in servers, users, applications, shares/exports. Group and track multiple migrations together with your own planning, progress reporting, and issue tracking.

Reduce effort and system outage time: DobiMigrate removes up-front and repetitive work so you can focus on what matters: managing by exception and resolving highlighted issues. DobiMigrate's speed, flexible planning, and dry-run simulations help optimize the planning and cutover of users and applications to the new storage system quickly.

Migrate at scale: DobiMigrate can move datasets as small as 5TB or 10TB, or as large as 20PB or more, using a unique scale-out approach.

Validate and maintain data integrity: DobiMigrate provides complete chain of custody for all migrated data with checksum values calculated and compared for every single migrated file.

Provides **flexibility:** With a few clicks of a button, DobiMigrate helps absorb any last-minute business, infrastructure, network, or operational restrictions that would affect the migration project.

Maintain control: DobiMigrate allows you to take control over migration activities as they progress. This control includes prioritization within the planning, migration granularity, network usage, and server load. At any point during the activities, accurate ETAs and durations help set expectations with stakeholders.

About Pure Storage Professional Services

Whether you are planning your next-generation storage system, need specialized know-how for a major storage deployment, or want to optimize the investment in your digital transformation, Pure Storage Professional Services and our certified partners have the expertise to assist. Discover how your IT environment can achieve the outcomes that matter most to your business. Contact your local Pure sales representative or visit www.purestorage.com.
