

# SafeMode Advisory Workshop

Expert advice and recommendations for deploying data protection features for FlashArray systems.

## Highlights

- Understanding of SafeMode technology
- Learn best practices with our experts

## Flexibility

- Work with the Pure Professional Services team to schedule a workshop with your teams.

## Outcomes

- A four hour workshop providing best practices and advice implementing data protection features.

## SafeMode for Data Protection

Backups safeguard critical data against common scenarios like disasters, data corruption, or accidental deletions. But ransomware can stress existing data-protection infrastructure even more. Pure Storage® SafeMode snapshots, available with FlashArray™, provide immutability to protect data backups from ransomware attacks.

Pure Storage Professional Services provides a four-hour workshop, designed to help customers understand and implement snapshot and replication techniques as part of a data protection strategy.

## The Customer Experience

Pure Professional Services is an integral part of the Pure Customer Experience (CX) team, with a mission of helping customer organizations evaluate, activate and innovate their IT solutions.

## Service Overview

Pure Professional Services will host a four hour, remotely delivered workshop explaining how Pure Storage SafeMode technology can be used to protect valuable data. This will be delivered as a single half day of discussion.

## Customer Responsibilities

In order to keep projects on schedule and ensure the necessary personnel will be available, it is important that both parties adhere to agreed-upon schedules and provide ample notice of any changes to those schedules.

## Deliverables

**A workshop led by our experts:** Pure Professional Services will host a four hour, remotely delivered workshop explaining how Pure Storage SafeMode technology can be used to protect valuable data. This will be delivered as a single half day of discussion. This session will include the following topics:

- SafeMode Technology overview.
- Best Practices for SafeMode Integration
- Sizing Advice for estimating capacity overhead based on retention and use cases.
- Snapshot retention recommendations.

## Limitations

- This service is limited to a workshop session of up to 4 hours.
- This service is limited to a maximum of 3 arrays.

## Assumptions

- All services are delivered remotely

## Out of Scope

- Design and documents of specific architectures.
- Implementation and configuration of snapshots or replication.
- Integration of 3<sup>rd</sup> Party software.
- Anything not listed in this document
