PURESTORAGE®
Uncomplicate Data Storage, Forever

TIERPOINT

Top Reasons to Choose TierPoint DRaaS Solutions Powered by Pure Storage

In an era where digital information is at the heart of business operations, data protection solutions have never been more vital.

The choice of provider for managing these solutions is a pivotal decision for companies. This underscores the value offered by TierPoint and Pure Storage—leaders in delivering flexible, reliable, and high-performance Managed Data Protection Solutions. Discover 7 key reasons why the TierPoint Disaster Recovery solution, powered by Pure Storage Evergreen//One™, is the perfect choice for your data protection needs. Our joint solution focuses on efficiency, reliability, and scalability, providing businesses with comprehensive, cutting-edge data protection.

1 Increased Scalability

Building DRaaS solutions with TierPoint and Pure Storage Evergreen//One Storage provides increased scalability for organizations. With our Evergreen//One solution, organizations can scale their storage capacity allowing businesses to quickly adapt to their changing business needs. This scalability also helps to reduce costs, as organizations are only paying for the storage they actually need.

2 Advanced Data Protection

TierPoint DRaaS solution also offers advanced data protection features. Organizations can take advantage of features such as replication, snapshots, and encryption at rest to ensure their data is protected against any potential threats. Additionally, organizations can leverage the built-in disaster recovery capabilities of the solution, like SafeMode™ Snapshots, to quickly recover from any outages or disasters that may occur.

3 Improved Performance

Organizations using TierPoint DRaaS solutions will benefit from improved performance. The solution utilizes a combination of all flash storage and cloud services in order to provide high-performance access to data, which helps improve application response times and user experience. Additionally, the solution is designed for maximum efficiency so organizations can get the most out of their storage infrastructure without sacrificing performance or reliability.

Agile and Adaptable Storage Solutions

TierPoint DRaaS offers a scalable storage solution that adapts to your business need. Adjustable. Optimized. Flexible.

Robust Security Features for Data Protection

Advanced data protection features safeguards your data against threats and ensures quick recovery from disasters.

High-Performance Storage for Greater Efficiency

Combine flash storage and cloud services to provide rapid restore data without compromising on performance or reliability.

4 Automated Management

Our solution also offers automated management capabilities, making it easier for organizations to manage their storage environment. The solution includes tools such as automated provisioning, monitoring, and reporting that help streamline administrative tasks and reduce manual effort required for managing the system.

5 Flexible Pricing Options[1]

Organizations using TierPoint DRaaS Powered by Pure Storage Evergreen//One Storage will also benefit from flexible pricing options that allow them to pay only for the resources they need on an ongoing basis without having to purchase hardware upfront or commit to long-term contracts. This makes it easier for businesses of all sizes to take advantage of the benefits offered by this DRaaS solution without breaking the bank in the process.

6 Comprehensive Support

TierPoint offers comprehensive support services throughout the life of your contract. This means that customers will be able to get answers quickly when they need help setting up or troubleshooting their DRaaS solutions without having to wait on hold or search through online forums for answers themselves.

7 Private Cloud & Integrations

TierPoint DRaaS Powered by Pure Storage Evergreen//One Storage offers the ability to secure your data and applications that are mission-critical to your business to a private cloud. With 40 data centers across, your DRaaS solution can be hosted at any one of our locations or even leveraged as a DRaaS target. Our private cloud solutions offer subscription based pricing and flexible payment options. Additionally, hybrid and public cloud on-ramps are available allowing for accelerated innovation and cost management for your business.

TierPoint's DRaaS solution, powered by Pure Storage Evergreen//One, offers businesses a robust and efficient data protection strategy. With features like increased scalability, advanced data protection, improved performance, automated management, flexible pricing options, comprehensive support, and private cloud, you can rest assured that your business data is always protected and accessible when needed.

Don't leave your data protection to chance. Choose a solution that grows with your business, protects your vital data, and provides seamless, high-performance access when you need it most.
